

# CRAiG

## CRISIS READY AI GUIDE

### GET THE RIGHT INFORMATION. FASTER.

CRAiG is Crises Control's AI crisis management assistant, built into the Crises Control platform. It helps authorised users retrieve live incident information, response plans, tasks, reports and operational procedures using natural language.

Ask questions, find the information you need and support faster, better-informed incident response.

**| Your data | Instant answers | Smarter response**

### WHY CRAiG?

#### Find Information Faster

Retrieve the incident information, plans, tasks, reports and procedures you need without searching across multiple screens.

#### Support Better Decisions

Get contextual answers based on available Crises Control platform data.

#### Keep Response Moving

Reduce the time spent searching for information during an incident.

### HOW CRAiG WORKS

#### Ask

Ask questions in plain language.

#### Find

Retrieve relevant information from available Crises Control platform data.

#### Understand

Get contextual answers based on your incident information and permissions.

#### Act

Use the information to support faster, better-informed response.

### WHAT CRAiG CAN HELP YOU FIND

01

#### Live Incident Information

Retrieve current incident updates and summaries.

02

#### Response Plans and Procedures

Quickly access the plans and operational procedures relevant to an incident.

03

#### Tasks and Actions

Find task information, progress and actions recorded during an incident.

04

#### Reports and Records

Retrieve reports, communication records and information from the operational record.

05

#### Communication and Acknowledgements

Access available communication and acknowledgement information.

### KEY BENEFITS
