

CRISES CONTROL INTEGRATIONS

CONNECT THE SYSTEMS YOU ALREADY USE.

Crises Control integrates with your existing identity, communication and business systems to simplify access, automate user management and connect critical workflows without replacing your existing infrastructure.

| [Secure Access](#) | [Automated User Management](#) | [Connected Workflows.](#)

FLEXIBLE INTEGRATION OPTIONS

Single Sign-On

Give users secure, one-click access to Crises Control using their existing corporate credentials.

User Provisioning

Automatically provision and synchronise users as your organisation changes.

SFTP & CSV Imports

Import user and group data securely from CSV files through SFTP, ideal for organisations without cloud identity providers.

Trigger Integrations

Connect external systems such as IT monitoring, service desks, fire detection and CCTV systems to trigger alerts and response workflows.

API Integrations

Connect Crises Control to other applications through APIs to support custom workflows and two-way data exchange.

Communication & Business Systems

Connect messaging and business applications to existing workflows without changing the systems your teams already use.

WHY INTEGRATE CRISES CONTROL?

- ✓ **Faster User Onboarding**
Automatically provision new users so "response teams are ready from day one.
- ✓ **Reduce Manual Administration**
Automate repetitive user management and minimise administrative effort.
- ✓ **Improve Security**
Use trusted identity providers and centralised authentication for stronger access control.
- ✓ **Maintain Operational Readiness**
Keep authorised users and responder information accurate and up to date.
- ✓ **Scale Across Your Organisation**
Synchronise users across departments and locations from one trusted source.
- ✓ **Support Compliance**
Maintain accurate user records and improve governance through automated processes.

CORE INTEGRATIONS

Microsoft Entra ID

Secure Single Sign-On (SSO) and automated user provisioning through Microsoft Entra ID.

Google Workspace

Authenticate users with Google Workspace Single Sign-On and simplify secure user access.

Okta

Enable secure authentication and identity management through Okta.

SCIM User Provisioning

Integrate with any application that supports SCIM to automatically synchronise user accounts.
