

SOS PANIC BUTTON

GET HELP WHEN IT MATTERS MOST.

The Crises Control SOS Panic Button gives employees, lone workers and frontline teams a fast and discreet way to request emergency assistance from the mobile app.

With a simple press and hold, an SOS alert is sent to authorised response teams with the employee's location and incident details, helping the right people respond quickly.

01

ACTIVATE

Raise an emergency alert directly from the Crises Control mobile app.

02

LOCATE

GPS location is included when location sharing is enabled, helping responders identify where assistance is needed.

03

ALERT

Instantly alert the designated response team with the information they need to act.

04

RESPOND

The SOS alert creates an incident in Crises Control, allowing authorised responders to coordinate communications and response activities.

Instant SOS Activation

Request emergency assistance quickly from the Crises Control mobile app.

Lone Worker Support

Give lone workers, contractors, travellers and frontline employees a direct way to request help.

Location Awareness

Share the employee's GPS location with authorised responders when an SOS is activated.

Discreet Assistance

Use silent push notifications to help employees request assistance discreetly when necessary.

Direct Communication

Optional call-back functionality enables communication between the person needing help and the response team.

Complete Incident Record

Capture the SOS alert, response activity and incident history for review and continuous improvement.

WHY SOS PANIC BUTTON?

- Fast**
Get an emergency alert to the right people quickly.
- Connected**
Move from an individual SOS to a coordinated organisational response.
- Location-Aware**
Give responders important location information when help is needed.
- Accountable**
Keep a complete record from the initial alert through to resolution.
